ADDENDUM 2

**REQUEST FOR PROPOSALS
PROFESSIONAL ENGINEERING SERVICES
for
COUNTY LINE ROAD UTILITY EXTENSION
RFP 15-90694-01**

***Proposers are required to acknowledge this addendum in their proposal.**

The following changes are made to the Request for Proposals, Section 6 – Scope of Services, Subsection Introduction:, Paragraph 6.

The City is requiring the project to be “fast-tracked.” A project schedule has been developed where in it is proposed to have the design and permitting performed within 12 weeks (excluding permit issuance) 6 weeks to bid and execute a construction contract, and have the installation completed in 12 weeks with the intent to have the facilities ready to be placed in service January 2016. The City, in order to reduce the design time shall have project survey performed, including SUE work and have a geotechnical investigation completed. These documents will be provided to the Engineer ~~prior to finalizing the fees for engineering services.~~ as soon as they are available. To assist the proposers in the preparing their proposal, a copy of as-build drawings for a section of the improvements of County Line Road and Right-of-Way maps are provided. Also, the City will pre-purchase pipe, valves, fittings and other long lead items required. A materials take-off will be prepared based on the 90% complete construction drawings prepared by the Engineer.

Notes to the above changes:

Due to the time required to complete the Survey, SUE and Geotechnical work they may not be available as quickly as anticipated.

The City was able to obtain a copy of the Record Drawings for the improvements for County Line Road and it was considered that these drawings would be of use to the proposers, therefore these drawings are provided on the City's website at <http://www.plantcitygov.com/index.aspx?nid=398>

All other terms and conditions of the original Request for Proposals remain the same.
