WALDEN LAKE
Polo and Country Club

WALDEN LAKE
REVISED COMMUNITY UNIT PLAN
(12-1-89)

UPDATED DEVELOPMENT DATA AS PER PROPOSED C.U. MODIFICATION
DATED DECEMBER 1, 1989

Land Use	Acreage	Dwelling Units	Gross Avg. Density
Platted Single Family	649.76	1580	2.43 du/ac
Unplatted Single Family	379.0	1103	2.91 du/ac
SINGLE FAMILY SUB-TOTAL	1028.76	2683	2.60 du/ac
Platted Multi Family	30	200	4.0 du/ac
Unplatted Multi Family	221	1755	7.9 du/ac
MULTI FAMILY SUB-TOTAL	251	1955	6.6 du/ac
Commercial	30.5		
Industrial	53.5		
School	34.0		
Golf Course	290.0		
Open Spaces	392.24		
SUB-TOTAL	800.24		
TOTAL	2080	4558	2.19 du/ac

Specific Unit Notes
Continued

- Unit 22 - Single Family (+/-) 76 acres, 239 units maximum, 3.15 units per acre maximum. Minimum setbacks shall be 10' side, 25' front and 30' rear. Maximum building height shall be 28'.
- Unit 28 - Single Family (+/-) 31 acres, 45 lots, 1.48 units per acre maximum. Minimum setbacks shall be 10' side, 25' front and 30' rear. Maximum building height shall be 28'.
- Unit 29 - Multi Family (+/-) 34 acres, 306 units maximum, 9 units per acre maximum. Minimum setbacks shall be 20' front, 20' rear, 10' side yards. Maximum building height shall be 45'. Parking spaces shall be provided at 1.8 spaces per unit, minimum.
- Unit 33 - Single Family (+/-) 177.5 acres, 500 units maximum, 2.8 units per acre. Minimum setbacks shall be 10' side yards, 25' setback for front and 30' rear yards. Maximum building height shall be 28'.
- Unit 33-2A - Setback remains as per detailed site plan and preliminary plat.
- Unit 36 - Multi Family (+/-) 58 acres, 313 unit maximum, 5.4 units per acre maximum. Minimum setbacks shall be 25' front, 20' rear unless abutting a street right-of-way where the rear yard shall be 40', and 30' side unless abutting a street right-of-way where the side setback shall be 25'. Parking spaces shall be provided at a minimum of 2.0 spaces per unit.
- Unit 37 - Single Family (Zero Lot Line) (+/-) 30 acres, 105 units maximum, 3.5 units per acre maximum. Minimum setbacks shall be 10' to one side, 0' to other, 25' setbacks for front and 20' rear yards. Maximum building height shall be 28'.
- Unit 41 - Commercial (+/-) 4.5 acres. Total square footage of retail space (as defined in Plant City Code) shall not exceed 10,000 square feet per acre. Uses shall be limited to those uses which have as their major function the sale of convenience goods and personal services, serving the residents and workers in the surrounding area.
- Unit 42 - Neighborhood Commercial (+/-) 19 acres. Total square footage of retail space (as defined in Plant City Code) shall not exceed 10,000 square feet per acre. Uses shall be limited to those uses which have as their major function the sale of convenience goods and personal services, serving the residents and workers in the surrounding area.
- Unit 44 - Office/Commercial/Residential (+/-) 10 acres, Commercial uses shall be limited to those uses which have as their major function the sale of convenience goods and personal services, serving the residents and workers in the surrounding area. Total square footage of retail space (as defined in the Plant City Code) shall be limited to 10,000 square feet per acre. Residential uses shall be limited to 62 town homes. Maximum uses whether commercial and/or residential shall not exceed 5,000 average daily trips (ADT).
- Unit 55 - Light Industrial (+/-) 39 acres. As per detailed site plan and preliminary plat.
- Unit 56A - Light Industrial (+/-) 8.1 acres. As per detailed site plan and preliminary plat.
- Unit 56B - (+/-) 6.4 acres limited to 42 town homes. Development of 56B will be as per detailed site plan/preliminary plat as well as the attached noise Mitigation Plan.

NOTES:

- Denotes indicated are maximum densities allowed and are to be applied to gross unit (foot) acreage, including conservation areas and open space within those units. The total number of dwelling units allowed for any unit (foot) may be clustered and the open space, retention/detention and/or conservation area within the unit (foot) stated in the density calculation.
- In subdivisions where estate lots are provided, bridge path easements may be allowed as well as keeping of horses where lot sizes are a minimum of 1.5 acres. Horses (including horses, ponies, mules, donkeys and other animals used for riding) shall be allowed at a density of 1 horse per acre. Any such designated unit shall also allow stable facilities at a maximum density of one (1) stall per acre. All such designated units shall be completely fenced along all property lines to the standards set forth in the used regulations. When horses are fed grain on pasture, there shall be one hundred thousand (100,000) square feet of pasture per horse if a single pasture is provided, or eighty thousand (80,000) square feet of pasture per horse. If two pastures are provided, there shall be one hundred thousand (100,000) square feet of pasture per horse. If no pasture areas are provided, then horses are not pastured, but are fed indoors in a dry lot, the minimum pasture area per horse shall be required.

The following minimum setbacks shall be provided: stables, corrals and piles of manure, feed and bedding shall be located seventy-five (75) feet from any street or non-residential lot line, fifty (50) feet from any neighboring residential lot line, one hundred (100) feet from any residence and seventy-five (75) feet from any neighboring land use (either existing or proposed), other than waterways and/or open spaces, in order to minimize odor and nuisance problems. Pile areas may extend to the lot line; however, when all of the runoff from a corral or exercise area is collected and directed over a one hundred (100) foot long grass swale before reaching the property line, the use of un-vegetated exercise areas, manure piles, and manure application areas shall be prohibited in areas with slopes greater than five (5%) percent. In ten (10) year floodplains, in waterways and/or open spaces, manure piles, and manure application areas shall be prohibited in areas with slopes greater than five (5%) percent. Manure shall not be allowed closer than seventy-five (75) feet to a well or to any surface water, unless the water is upgraded to a adequate quality to comply with Hillsborough County Health Department and all other jurisdictional standards.

A one hundred (100) foot wide area of vegetation cover, exclusive of pasture area, shall be maintained between any corral, un-vegetated exercise area, manure pile, or application area and any surface water or well, in order to minimize runoff, prevent erosion, and promote quick nitrogen absorption. Corral, un-vegetated exercise areas, manure piles, and manure application areas shall be prohibited in areas with slopes greater than five (5%) percent. In ten (10) year floodplains, in waterways and/or open spaces, manure piles, and manure application areas shall be prohibited in areas with slopes greater than five (5%) percent. Manure shall not be allowed closer than seventy-five (75) feet to a well or to any surface water, unless the water is upgraded to a adequate quality to comply with Hillsborough County Health Department and all other jurisdictional standards.

In lieu of providing land for a fire station site within this CU, the Developer shall pay to the City of Plant City \$25,000 on the effective date of the ordinance approving the 1989-1990 CU modification. Further, the Developer, his successors or assigns, shall pay to the City an additional \$100,000 or more before the first business day of June 1992.

Mandatory Road shall be vacated prior to the development of any subsection of Unit 33 which includes or lies immediately adjacent to a R.O.W.

Access to Units 15 & 42 from Alexander Street shall be restricted to existing median cuts.

- Definitions of use types as follows:
- Single Family - Units which shall be detached single family residences including, but not limited to zero lot line path homes and estates (see note #2).
 - Multi Family - refers to structures designed to serve as residences for two (2) or more families including, but not limited to garden apartments, condominiums, townhomes and duplexes.
 - Commercial - as defined for specific unit.
 - Industrial - as defined for specific unit.
 - School - as described in general guidelines.

Specific Unit Notes

- Unit 2 (Farney Estates) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 7.5' for side yards.
- Unit 3 - Multi Family (+/-) 12 acres, 144 units maximum, 12 units per acre maximum. Minimum setbacks shall be 30' front, side and rear, 10' side yards. Maximum height shall be 60'. Parking spaces shall be provided at 1.8 spaces per unit minimum.
- Unit 10 - Multi Family, 27 acres, 162 units maximum, 6 units per acre maximum. Minimum setbacks shall be 20' front and rear yards, 10' side yards. Maximum building height shall be 45'. Parking spaces shall be provided at 1.8 spaces per unit minimum.
- Unit 11A & Unit 11B - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 10' for side yards.
- Unit 14 - (Wedgewood) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 10' for side yards.
- Unit 15 - Multi Family, 70 acres, 665 units maximum, 9.5 units per acre maximum. Setbacks shall be: Front - 25' Rear - 60' between bldgs or 40' from R.O.W., side - 40' between bldgs, or 25' from R.O.W., 60' max. bldg height, 2 parking spaces per unit. Primary entrance on Airport Road.
- Unit 15B - (Charleston Woods) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 10' for side yards.
- Unit 18 - (Tanglewood) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 10' for side yards.
- Unit 19 - Single Family (+/-) 27.5 acres, 83 lots, 3 units per acre maximum. Minimum setbacks shall be 25' front, 30' rear, and 10' side yards. Maximum building height shall be 28'.
- Unit 20 - (Hammocks) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 10' for side yards.
- Unit 22 - Multi Family (+/-) 20 acres, 165 units maximum, 8.25 units per acre maximum. Minimum setbacks shall be 10' side yards, 20' front and rear yards. Maximum building heights shall be 45'. Parking spaces shall be provided at 1.8 spaces per unit minimum.
- Unit 23 - Single Family (+/-) 37 acres, 130 units maximum, 3.5 units per acre maximum. Minimum setbacks shall be 25' front and 30' rear, and 10' side yard setbacks. Maximum building height shall be 28'.
- Unit 24 - (Paddock, including Phases 2 & 3) - Single Family. Minimum setbacks shall be 25' front, 30' rear, and 7.5' for side yards.
- Unit 26 - (Forest Club) - Single Family. Minimum setbacks shall be 25' front, 30' rear. Side yard setbacks to be 10' on one side of structure and 12' on other side of structure so that there is a minimum of 22' between structures.

(A) Physical Barrier at the Northern Property Boundary: Prior to the issuance of the First Certificate of Occupancy, a sound barrier wall shall be constructed of concrete on grade level to a height of 20 feet above M.N. Plotted, 8' x 8' parking slab elevation, to be positioned beginning 50 feet east of M & N's building southwest corner, and extending uninterrupted to the western edge of the property north boundary to a point not less than 100 feet east of Turkey Creek Drive eastern right-of-way line. The wall will be constructed with 5 feet of M & N north property line with a berm or other landscaping features applied to the south side only. The wallform will be reduced to 12 feet in combined height from the point 100 feet east of Turkey Creek Road to the right-of-way line. Notwithstanding the wallform will be constructed in accordance with any City traffic sign obstruction requirements.

A new separate homeowners' association shall be established for Units 56B and 44 which shall be responsible for the maintenance of the barrier wallform. Plant materials shall be planted on the south side of the wall, in no less than a 4' wide buffer strip. The wall landscaping shall meet the quality standard of Section 100-333 (1)(b) and (2). A vinyl privacy fence, no less than 6' high, shall be extended from the eastern end of the sound barrier wall eastward to the adjacent property line. The fence shall be similar to the fence which shall be placed near the north western dwelling units. The new separate homeowners' association shall be responsible for maintaining the water feature in operational condition.

(B) Site Design and Layout: The closest point of any habitable structure to the north property line shall be no less than 10 feet south of the South property line of M & N. The closest habitable structure shall be oriented with their sides toward the South property line of M & N. The layout of all habitable structures shall be such as to mitigate any noise level standard exceedances, at such structures location on the site to the maximum extent practicable and feasible. For example, side walls shall be facing north and related outdoor amenities shall be located on the southerly side of or backside of structures.

(C) Construction Techniques: All habitable structures shall be designed and constructed of materials and in a manner to minimize any noise level exceedances at the location of that habitable structure, to the maximum extent practicable and feasible. Any penetrations to the northern side of the closest habitable structure to the North property line shall be fixed and dual pane sound rated windows, or otherwise designed to not admit sounds of an intensity exceeding the levels established in the various controlling regulations. Such rated windows shall have an STC rating of 35 db to 40 db, according to methods conducted in accordance with ASTM E90-00 in a National Voluntary Laboratory Accreditation Program certified acoustical laboratory. The sides of the closest habitable structures to the North property line shall be full height concrete and mortar wall.

Notes: May - August 1988 Revision to CU Zoning

The extension of Griffin Blvd. to Turkey Creek Road shall be concurrent with the submission of the Final Plat of Unit 19.

The extension of Charlie Griffin Road to Mud Lake Road shall be concurrent with the submission of the final Plat of Unit 29 and Unit 36, whichever comes first.

The extension of Timberlane Drive to Tanglewood Road shall be concurrent with the submission of the Final Plat of Unit 33 or Unit 34, whichever comes first.

- REVISED: MARCH 25, 1988
- REVISED: JANUARY 31, 1989
- REVISED: NOVEMBER 29, 1989
- REVISED: MARCH 13, 2000
- REVISED: JUNE 20, 2006
- REVISED: APRIL 12, 2010 (ORD 11-2010)

Unit 61 - Assisted Living Facility 10.41 acres, the number of units shall be no more than 80 units with kitchens or 121 units without kitchens or combination thereof and shall be consistent with the density and setbacks set forth in the R-2 requirements applicable to Assisted Living Facilities as defined in Division 102 of the Plant City Code of Ordinances. Maximum building height shall be 35' however only two livable floors shall be permitted within the 35' height. Parking and circulation shall be consistent with Division 11 of Article VII of Chapter 102 of the Plant City Code of Ordinances. The development shall be designed to reflect a residential character and have a pitched roof. The development shall be oriented so that service entrances are located on the north and west sides of the Unit. A minimum 30' foot landscaped buffer will be provided along the golf course side of the Unit.

Unit 62 - Multi-Family 54.83 acres, 156 units, multi-family setbacks and building separations shall be consistent with Section 102-445, as amended. Development may include townhomes and duplex forms of development. If townhomes are developed, no more than 4 townhomes shall be grouped together in one building footprint provided however where townhomes about condominium units in Unit 8, townhomes will be restricted to groupings of no more than 3 units per building footprint. Development may be built to a height of 35 feet but may only contain two livable floors and must have rooflines (pitched and/or gabled) reasonably in character with adjacent residential development. A minimum landscaped buffer of 30 feet shall be provided where the Unit abuts existing residences or existing ROW. This buffer shall be maintained by the HOA(s) or Condominium Association(s) formed for Unit 62. No buffer shall be required between Unit 62 and Unit 63.

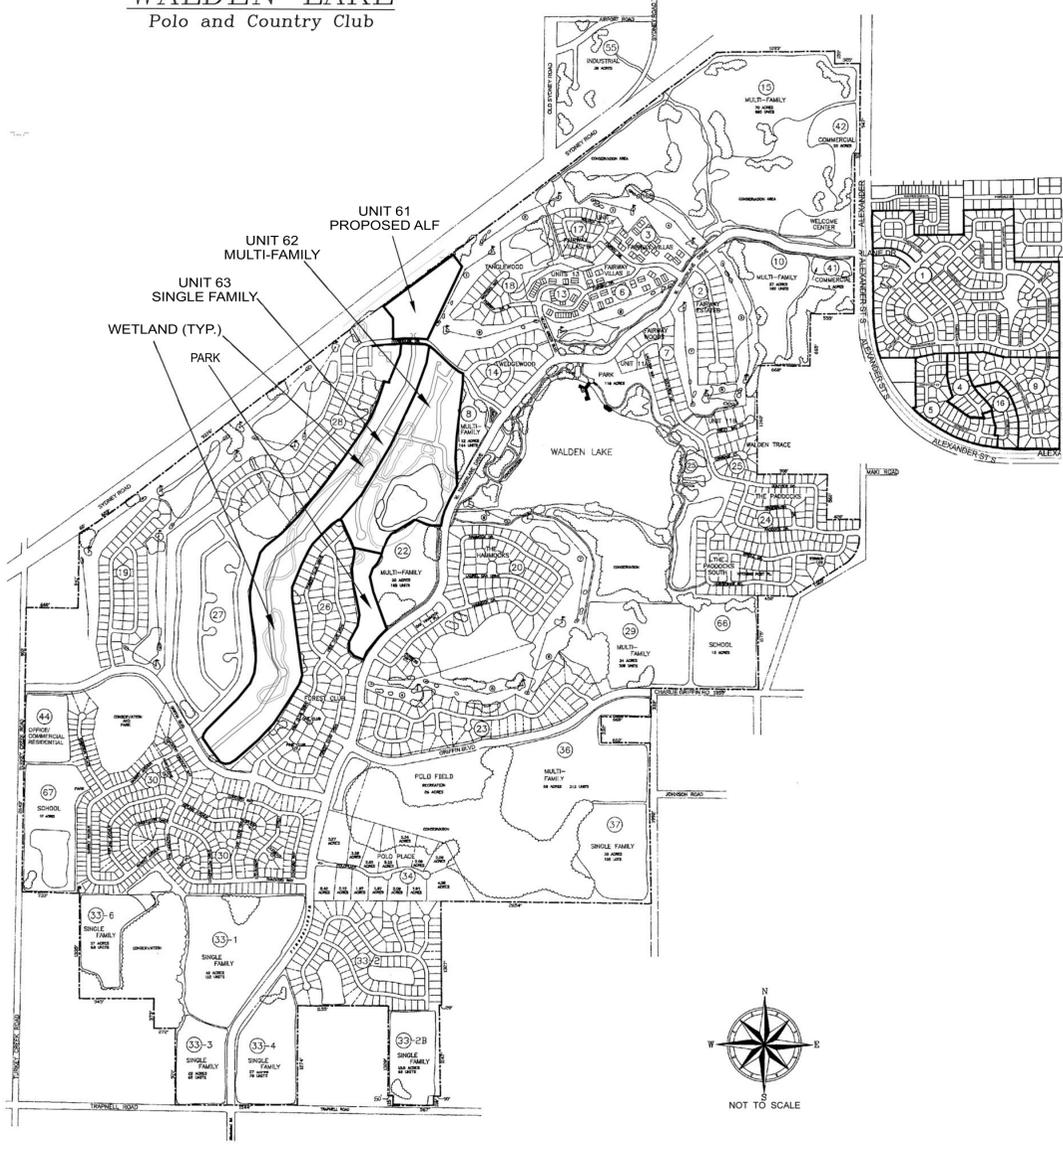

Unit 63 - Single Family 61.86 acres, 146 lots, minimum setbacks shall be 25' front, 30' rear, 10' side yards, 20' street side-yard setback. Development shall have a minimum lot size of 10,000 square feet and a minimum lot width of 65 feet. Development may be built to a height of 28 feet but may only contain two livable floors and must have rooflines (pitched and/or gabled) reasonably in character with adjacent residential development. A minimum landscaped buffer of 30 feet containing an earthen berm shall be provided where Unit 63 abuts existing single family residences. Where a new water feature abuts existing single family residences a greater separation shall be provided. Such buffer shall not be part of a platted residential lot. However, due to the significant vegetation that exists between Unit 28 and Unit 63 a buffer is not required. Buffers provided shall be maintained by the HOA created by the new subdivision.

Multi-Family Unit 62 contains a 5-acre park with Lake Access which will be open for use by all residents of Walden Lake Polo and Country Club. The park will be maintained by the HOA(s) and Condominium Association(s) established for the new development. The park shall be a passive park and may include playground equipment.

Approval of this PD Modification creating Units 61, 62, and 63 by Plant City does not constitute a guarantee that Environmental Protection Commission approvals/permits necessary for the development as proposed will be issued, does not intend to justify any impact to wetlands, and does not grant any implied or vested right to environmental approvals.

Prior to the issuance of any building or land alteration permits or other development permits, associated with this zoning modification the approved wetland/OSW line must be incorporated into the site plan. The wetland/OSW line must appear on all site plans, labeled as "EPC Wetland/OSW".

Final design of buildings, stormwater retention areas, and ingress/egress points are subject to changing final agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.

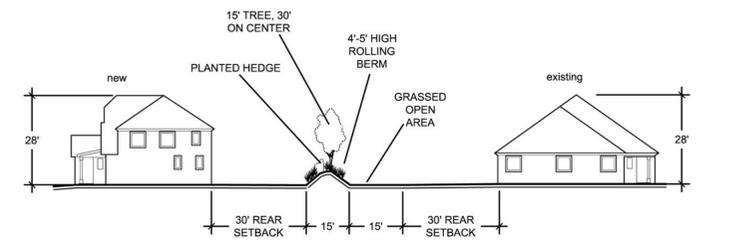

DEVELOPMENT REQUIREMENTS

- Storm water, drainage and retention requirements shall meet the specifications of the approved Walden Lake Master Drainage Plan in file with the Plant City Engineering Office.
- Potential environmentally sensitive lands have been identified based on the locations of hydric soils as shown on the soils map and is incorporated in this development approval by reference. The wetlands which have been shown on the master development plan as conservation areas may not constitute the full extent of the development's wetlands system. Therefore, development in any hydric soils area will require pre-development EPC and/or DER inspection and staking of any jurisdictional areas identified by the appropriate agencies. When wetlands are identified on or adjacent to a development site, they shall be labeled as "conservation areas" on the detailed site plan and subdivision plans (where applicable). Individual site plans shall conform to all applicable rules and regulations that may be imposed by the appropriate jurisdictional agencies, and the City of Plant City, including required setbacks and other requirements to be wetlands. Identified wetlands shall remain undisturbed during and following development.
- Wetlands and wetland setback areas may be used for stormwater management systems or construction of minor recreational improvements, such as elevated boardwalks, unpaved trails, overlook parks, and other similar recreational amenities which do not require the use of impervious surfaces. Conservation areas may be used as unpaved, passive recreational areas.
- Shovelings of naturally occurring water bodies shall be planted with native wetlands vegetation.
- Parks and open spaces that serve the entire development will remain private and will be deeded to the Master Homeowners Association, which will be responsible for their upkeep and maintenance.
- Individual subdivision sidewalk requirements have been met with the existing and proposed bike pathing trail network in the approved CU plan. Bridge path easements in appropriate subdivisions shall be laid together by bridge paths through wetlands setback and other open space areas. Bridge paths shall be maintained in an unpaved condition and shall be developed independently of bicycle trails.
- Certain temporary agricultural or recreation uses shall be allowed on any undeveloped portion of the Community Unit. Uses allowed shall include cattle and horse grazing, stableback shop, small scale farming and horse trails, unpaved recreational fields and the like. All pasture and farming uses shall be subject to the standards for keeping of livestock on estate lots as described in the conditions of approval.
- Individual unit recreation and open space requirements have generally been met within the overall CU through provisions of open space, recreation, golf course and conservation areas. Each subdivision will be provided access to active and passive recreation areas within Walden Lake by extension of the existing and proposed bike path system. Bike paths will be extended to new subdivisions as they are developed and will interconnect with the entire bike path network. The bike path network will be constructed in such a manner as to create minimal traffic conflicts with major arterial roads, any crossing of such roads will be provided with adequate safety measures.
- Public Facilities and Utilities
 - Sewer and water requirements shall meet the specifications of the approved Walden Lake Master Sewer Collection and Wastewater Distribution Plan and Systems Calculators (dated May 4, 1982) on file with the Plant City Engineering Office. All development within the project shall be served by Plant City Sewer and Water.
 - As per agreement between Walden Lake, Inc., and the Hillsborough County Public School System and required by the City of Plant City, Walden Lake, Inc., will provide three (3) school sites as shown on the general plan. Specifically, two (2) elementary school sites of at least 15 acres each in size and one (1) middle school site of at least 25 acres in size shall be deeded to the school board within 180 days of notice by the school board that the threshold of Walden Lake's population requires use of the site. This threshold shall be determined as per the criteria used by the school board at that time. These school sites will be deeded to the school board for the purpose of classroom facilities to be constructed on the site which will primarily address the needs of the Walden Lake development. School construction shall commence on the designated sites no less than 5 years after Walden Lake's population warrants their need.
 - If a classroom facility has not been started within that time, the property will revert back to Walden Lake, Inc. unless the school board declines use of the site, in which case, the school board shall be deemed to have accepted the site, and shall revert to a single family detached designation as a maximum density of 5 units/acre.
 - Walden Lake reserves the right of site and architectural approval of all facilities constructed, but will not unreasonably withhold this approval.
 - If the school needs thresholds as set by the school board are not reached by Walden Lake's population of buildout for unit #67, or the school board declines use of this site, it shall revert to a single family detached designation as a maximum density of 5 units/acre.

General Site Development Requirements

- The overall Community Unit total project density shall not exceed 5.0 units/acre.
- In units where the final surveyed acreage is greater or less than shown on the plan, the total number of units may be adjusted to the number allowed as per the approved density multiplied by actual number of acres, provided this does not exceed the overall Community Unit density of 5 units per acre.
- Adequate buffer areas as defined in Chapter 111, Section 111.19 of the Plant City code shall be constructed between all dissimilar uses, provided, however, that existing natural vegetation may be credited by the planning staff towards fulfillment of all or part of the buffering requirements.
- Setbacks and maximum building heights shall be applied as delineated on the master site plan by unit.
- Modular offices for real estate sales shall be allowed as a temporary use in residential subdivisions. Such offices shall be limited to one per residential subdivision and use as a residence is prohibited. Sales offices shall be removed upon completion of all sales in that subdivision.
 - Notes: (Sept. - Dec. '87 Revision to CU Zoning)
- Acceleration/deceleration lanes shall be provided by the developer as approved by the City Engineer.
- All fire stations shall be provided by the developer. Requirements shall be in accordance with the City's standards and approved by the City Engineer.
- Fire hydrants shall be provided by the developer as required by the City's Fire Chief.
- Buffering shall be provided to separate the commercial from the residential uses, and along the Alexander Street right-of-way.
- All areas designated as a "conservation area" by the appropriate regulatory agency shall be protected and not disturbed during pre and post construction activities.
- The developers of Walden Lake agree to pay the development's proportionate share of any signalization required south of Grant Street including the Menomona intersection along Alexander Street identified by a traffic study completed by Plant City or the developer. Payment shall be upon completion of final engineering and scheduling of the specific improvements for construction by the City of Plant City.

30' BUFFER WITH LANDSCAPE BERM EXAMPLE

BUFFER EXAMPLES 1 & 2 APPLICABLE TO UNITS 61, 62, 63 ONLY

WATER FEATURE BUFFER EXAMPLE
